Cutelab Monthly

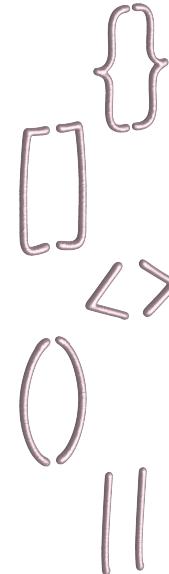

with
Max Ardit
(and Bela the Cat)

Upon an annual return to a rather humid New York City, I bring you the inaugural CuteLab monthly newsletter. As one of CuteLab's multinational assets, I spend most of my time outside the city, which affords me some distance from the usual overstimulation caused by longterm habitation within the five boroughs.

While this isn't necessarily an ideal situation—I miss my NYC friends every waking moment I'm away—it does put me in a unique position to periodically surveil the happenings of CuteLab from my other dwelling (previously Montréal, now Paris). Let it be known that this surveillance is purely out of longing and homesickness, as I am but a born and bred Brooklyn boy.

So alas, I share with you this monthly newsletter. Here you can find information about everything happening at CuteLab each month. This includes concerts, workshops, talks, events, and more. You'll also find some occaisional nonsense from yours truly—feel free to skip that stuff.

Peace and love
— M.A.

Arts & Leisure

Music - 08/24

Technical Reserve
ft. Jack Wright

\$15 - NOTAFLOF
Doors at 7:30pm
Music at 8:00pm

Check out Jack's book "The Free Musics," which you can peruse at the show using the copy we have in our little CuteLab library.

You can order the book here:
http://www.springgardenmusic.com/Spring_Garden_Editions.htm

Or pop on over to our friends at **Downtown Music Gallery** and buy a copy there

Music - 08/31

Phoenix Herring
& Vincenzo Johnson,
Max Ardito,
Jon Elbaz
& Meesh Sara Fradkin

\$10-15 - NOTAFLOF
Doors at 7:30pm
Music at 8:00pm

Op-Ed

Thirty-Second Interview With Meesh Sara Fradkin

MA - President of the European Commission Ursula von der Leyen recently stated during her address at the World Economic Forum that "The world is not at a single inflection point. It is at multi inflection points" [sic]. How would you use inflection points to describe your work, be it one or many?

MF - Please ask me the question again without Ursula von der Leyen

Max's August Picks

Now with new and improved monthly themes!

This month's theme: **Books That Will Make You Cry***

Equations Of The Month

$$\Omega^0(M) \xrightarrow{d} \Omega^1(M) \xrightarrow{d} \cdots \xrightarrow{d} \Omega^{k-1}(M) \xrightarrow{d} \Omega^k(M) \xrightarrow{d} \Omega^{k+1}(M)$$

$$L^2(G) = \bigoplus_{\pi \in \Sigma} E_\pi^{\oplus \dim E_\pi}$$

$$W_z(t, f) = \int_{-\infty}^{\infty} e^{i2\pi k\left(t+\frac{z}{2}\right)^2} e^{-i2\pi k\left(t-\frac{z}{2}\right)^2} e^{-i2\pi \tau f} d\tau$$

Random Shoutout Endnotes

Shout out to **Hannah, Hannah, and Hannah** from Montréal, especially for their CuteLab visit earlier in March.

Shout out to Nova Scotia's **Townie**; your show at Quai de Brume was unreal. Shout out to **Lev Snowe**, former Manitoban and soon to be NYC resident. Thanks for taking us to your cottage in Gimli!

*Disclaimer: None of these books actually made me cry. However, a few tears were shed while reading Löh's chapter on Cayley Graphs.
